No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1980 articles are the same as those shown for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 109

NUMBER 1, NOVEMBER 15, 1980

CHROMATOGRAPHIC AND ELECTROPHORETIC TECHNIQUES

- Determination of Serum and Plasma Uridine Levels in Mice, Rats, and Humans by High-Pressure Liquid Chromatography *Jean M. Karle, Lawrence W. Anderson, Daniel D. Dietrick, and Richard L. Cysyk* 41
- The Determination of Dissociation Constants by Affinity Electrophoresis on Cibacron Blue F3G A-Agarose-Polyacrylamide Gels *S. J. Johnson, E. C. Metcalf, and P. D. G. Dean* 63
- Separation and Quantitative Analysis of Rat Testis Histones by One-Dimensional Gel Electrophoresis *Marie L. Chiu and J. Logan Irvin* 102
- Simultaneous Determination of Unconjugated Homovanillic Acid, Vanilmandelic Acid, and 3-Methoxy-4-hydroxyphenylethylene glycol, in Serum by Mass Fragmentography and Deuterated Internal Standards *Frits A. J. Muskiet, Gijs T. Nagel, and Bert G. Wolthers* 130
- A Rapid High-Performance Liquid Chromatography Purification Method of Iodinated Polypeptide Hormones *N. G. Seidah, M. Dennis, P. Corvol, J. Rochemont, and M. Chrétien* 185

ENZYMATIC ASSAYS AND ANALYSES

- A Simple and Ultrasensitive Enzymatic Assay for the Quantitative Determination of Lysozyme in the Picogram Range *Michael E. Selsted and Rafael J. Martinez* 67
- New Fluorogenic Substrates for Horseradish Peroxidase: Rapid and Sensitive Assays for Hydrogen Peroxide and the Peroxidase *Kiyoshi Zaitzu and Yosuke Ohkura* 109
- A Sensitive and Specific Radiometric Method for the Measurement of Plasma Histamine in Normal Individuals *M. J. Brown, P. W. Ind, P. J. Barnes, D. A. Jenner, and C. T. Dollery* 142

LIPIDS AND LIPOPROTEINS

- Quantitation of Galactocerebrosides and Sulfatides by Galactose Oxidase and Sodium Borotritide *Harmeet Singh and Julian N. Kanfer* 27
- Complete Profiling of Some Eicosanoids Using Glass Capillary Gas Chromatography with Flame Ionization Detection: Application to Biological Samples *Jacques Maclouf, Hortense de La Baume, Jacques Caen, Hélène Rabinovitch, and Michel Rigaud* 147

MEMBRANES AND RECEPTORS

- Fast Tracer Efflux from Membrane Vesicles: Investigation by Controlled Elution *H. H. Grünhagen* 18

NUCLEIC ACIDS AND PROTEIN SYNTHESIS

- The Bidirectional Transfer of DNA and RNA to Nitrocellulose or Diazobenzyloxy-methyl-Paper *Gale E. Smith and Max D. Summers* 123
- Rapid Group Separations of Nucleotides and Related Compounds on Silica Columns *Clinton D. Lothrop, Jr., and Mayo Uziel* 160
- Synthesis of Carrier-Free β -³²P-Nucleosides-Triphosphate in Almost Quantitative Yields *Gabriel Kaufmann, Mordechai Choder, and Yoram Groner* 198

PEPTIDES, AMINO ACIDS, AND AMINO ACID DERIVATIVES

- The Explicit Analysis of Consecutive Pseudo-First-Order Reactions: Application to Kinetics of Thiolysis of Dithiasuccinoyl (Dts) Amino Acids *George Barany* 114
- Analysis of the Amino Acid 3-Methylhistidine by Gas-Liquid Chromatography *T. W. Larsen and R. F. Thornton* 137
- Effect of Different Alkalies, Temperature, and Hydrolysis Times on Tryptophan Determination of Pure Proteins and of Foods *Bernardo Lucas and Angela Sotelo* 192

PROTEIN ANALYSES AND REAGENTS

- Modification of Available Arginine Residues in Proteins by *p*-Hydroxyphenylglyoxal *R. Bryan Yamasaki, Antonio Vega, and Robert E. Feeney* 32
- An Absolute Method for Protein Determination Based on Difference in Absorbance at 235 and 280 nm *John R. Whitaker and Per Einar Granum* 156

PURIFICATION OF ENZYMES AND PROTEINS

- Highly Reactive Impurities in Triton X-100 and Brij 35: Partial Characterization and Removal *Yacov Ashani and George N. Catravas* 55
- Simple Procedure for Purification of Diphtheria Toxin and Separation of Its Fragments by Hydrophobic Chromatography *Y. Nitzan (Zaidenzaig) and T. Michalsky (Stern)* 71
- Elution of Proteins from Sodium Dodecyl Sulfate-Polyacrylamide Gels, Removal of Sodium Dodecyl Sulfate, and Renaturation of Enzymatic Activity: Results with Sigma Subunit of *Escherichia coli* RNA Polymerase, Wheat Germ DNA Topoisomerase, and Other Enzymes *Dayle A. Hager and Richard R. Burgess* 76
- A One-Step Procedure for the Determination of Protein Kinase Activities and a Protein Kinase Inhibitor in Nuclear Extract *Francoise Farron-Furstenthal* 203

SPECIAL TECHNIQUES

- An Improved Method for Assaying Pyrophosphate Exchange Measuring Cerenkov Radiation *Bent S. Hansen* 12

SUBCELLULAR FRACTIONS AND SEPARATION

- Reversed-Phase Boronate Chromatography for the Separation of *O*-Methylribose Nucleosides and Aminoacyl-tRNAs *Ram P. Singhal, Ravi K. Bajaj, Charles M. Buess, David B. Smoll, and Vikram N. Vakharia* 1
- Rapid Purification of Covalently Closed Circular DNAs of Bacterial Plasmids and Animal Tumor Viruses *Gary K. McMaster, Richard J. Samulski, Janet L. Stein, and Gary S. Stein* 47
- Distribution of Secretory Granules from Adrenal Medulla and Neurohypophysis on Continuous Isoosmotic Density Gradients Formed with a New Ioxaglic Derivative AG-6227 *Jean J. Nordmann and Dominique Aunis* 94

VITAMINS, COENZYMES, AND NUCLEOTIDES

- Analytical and Preparative High-Performance Liquid Chromatography Separation of Flavin and Flavin Analog Coenzymes *David R. Light, Christopher Walsh, and Michael A. Marletta* 87

Determination of Three Different Pools of Reduced One-Carbon-Substituted Folates.
I. A Study of the Fundamental Chemical Reactions

Isao Eto and Carlos L. Krumdieck 167

NUMBER 2, DECEMBER 1980

REVIEW

Removing Unbound Detergent from Hydrophobic Proteins *Anna J. Furth* 207

CARBOHYDRATES

Determination of Hyaluronate in Biological Samples by a Specific Radioassay Technique *Ulla B. G. Laurent and Anders Tengblad* 386

Detection of Gangliosides that Bind Cholera Toxin: Direct Binding of ¹²⁵I-Labeled Toxin to Thin-Layer Chromatograms
John L. Magnani, David F. Smith, and Victor Ginsburg 399

An Automated Version of the Periodate-Thiobarbituric Acid Assay for Analysis of Δ-4,5 Unsaturated Uronic Acids and Its Application to the Assay of Hyaluronic Acid and Chondroitin Sulfates *Mark E. Adams and Helen Muir* 426

Colorimetric Method for the Assay of Heparin Content in Immobilized Heparin Preparations *P. K. Smith, A. K. Mallia, and G. T. Hermanson* 466

CELL CULTURE

Selection of Mitotic Chinese Hamster Ovary Cells from Microcarriers
John J. Y. Ng, Charles L. Crespi, and William G. Thilly 231

CHROMATOGRAPHIC AND ELECTROPHORETIC TECHNIQUES

Two-Dimensional Isoelectric Focusing/Sodium Dodecyl Sulfate Gel Electrophoresis of Protein Mixtures Containing Active or Potentially Active Proteases: Analysis of Human Exocrine Pancreatic Proteins *W. Bieger and G. Scheele* 222

A Method for Measuring Nucleotides in the Liver of Rat with Isotachophoresis
Göran Eriksson 239

A Simple Electrophoretic Procedure for the Determination of the Polypeptide Composition of the Subunits of Fraction 1 Protein
D. Cammaerts and M. Jacobs 317

Variables in the High-Performance Anion-Exchange Chromatography of Proteins
George Vanecek and Fred E. Regnier 345

High-Pressure Liquid Chromatography of Neurotoxic Phenylphosphonothioate Esters and Related Compounds
Jerome M. Lasker, Kandiah Sivarajah, Thomas E. Eling, and Mohamed B. Abou-Donia 369

Analytical Chromatography of Ribosomal Proteins in the Fungus, *Podospira anserina*
Evelyne Coppin-Raynal 395

A Convenient, Rapid Method for the Resolution of Enantiomeric Amino Acids Using Chiral Phases on Stainless-Steel Capillary Gas Chromatographic Columns
Grant Gill Smith and David M. Wonnacott 414

A New Thin-Layer Chromatographic Approach for Separation of Multisialogangliosides: Novel Ganglioside Fractions in the Embryonic Chicken Brain
Harald Rösner 437

A Method for Efficient and Selective Recovery of Membrane Glycoproteins from Concanavalin A-Sepharose Using Media Containing Sodium Dodecyl Sulfate and Urea
Laurent Poliquin and Gordon C. Shore 460

ENZYMATIC ASSAYS AND ANALYSES

- Steady-State Kinetic Studies of Arginase with an Improved Direct Spectrophotometric Assay
C. Nick Pace, Andres Buonanno, and Jeannie Simmons-Hansen 261
- Visual Detection of Fructose-1,6- P_2 Aldolase after Electrophoresis by its Oxidative Paracatalytic Reaction
Philipp Christen and Alice Gasser 270
- A Rapid and Efficient Microassay of Ornithine Decarboxylase
David S. LaPointe and Robert J. Cohen 291
- A Unified Method for the Assay of Uridine Diphosphoglucuronyltransferase Activities Toward Various Aglycones Using Uridine Diphospho[U- ^{14}C]Glucuronic Acid
Surendra K. Bansal and T. Gessner 321
- A New Assay for Ferredoxin-Dependent Glutamine Oxoglutarate Amino Transferase (Glutamate Synthase) Using Electrolytically Reduced Methyl Viologen
D. P. Hucklesby, O. A. M. Lewis, and E. J. Hewitt 357
- A Sensitive Kinetic Assay for UDPGlucuronosyltransferase Using 1-Naphthol as Substrate
Peter I. Mackenzie and Osmo Hänninen 362
- A Convenient Plate Assay for the Quantitation of Hyaluronidase in Hymenoptera Venoms
Paul G. Richman and Harold Baer 376
- Indices of the Activation State of Glycogen Synthase
Scott M. Van Patten and Donal A. Walsh 432

IMMUNOLOGICAL PROCEDURES

- Solid-Phase Immunoassay of Dog Neutrophil Elastase
Umberto Kucich, William R. Abrams, and Harold L. James 403

INORGANIC AND METALLOORGANIC COMPOUNDS

- A Simple Method for Removing Aluminum from Adenosine-5'-triphosphate
Leif P. Solheim and Herbert J. Fromm 266

INSTRUMENTATION

- Microinjection of *Xenopus* Oocytes: An Automated Device for Volume Control in the Nanoliter Range
Michael J. M. Hitchcock and Robert M. Friedman 338

METABOLITE DETERMINATION

- Rapid Radioisotopic Analysis of Glucose Synthesis from Lactate in Primary Hepatocyte Cultures
John W. Brown, Hyam L. Leffert, Stewart Sell, and Ren-jye Ho 284
- A Rapid Method for Isolating Glucose Metabolites Involved in Substrate Cycling
Roy H. Hammerstedt 443

NUCLEIC ACIDS AND PROTEIN SYNTHESIS

- A Hybridization Method for Autoradiographic Visualization of Small Unique Sequence Fragments Resolved on Polyacrylamide Gels
P. Williamson 309
- Microfluorometric Filter Determination of DNA in Sucrose Density Gradients
B. Rózga, A. Koceva-Chyła, and E. Poziomska 474

PEPTIDES, AMINO ACIDS, AND AMINO ACID DERIVATIVES

- Side Reaction of Methionine with 4-Vinylpyridine during Acid Hydrolysis of Modified Proteins *J. Heukeshoven* 421

PHYSICAL TECHNIQUES

- An Apparatus for the Titration of Small Samples *R. B. Spokane, R. V. Brill, and S. J. Gill* 449

PROTEIN ANALYSES AND REAGENTS

- Anomalous Interaction of 2-Thiopyridone with Proteins During Thiol-Disulfide Interchange Reactions *Robert B. Harris and Leonard T. Hodgins* 247
- Synthesis of Methyl[³H]acetimidate of High Specific Radioactivity, a Reagent for Radiolabeling Proteins *John Armstrong, Peter F. Leadlay, and Richard N. Perham* 410
- Dye-Binding Assay For Protein Solubilized in the Presence or Absence of Sodium Dodecyl Sulfate *Zahur Zaman and Robrecht L. Verwilghen* 454

PURIFICATION OF ENZYMES AND PROTEINS

- A New Method for Affinity Chromatography of Heme-Binding Proteins: Synthesis and Characterization of Hematin- and Hematoporphyrin-Agarose *Kenneth W. Olsen* 250
- Purification of the Human Serum Inter- α -Trypsin Inhibitor by Zinc Chelate and Hydrophobic Interaction Chromatographies *J. P. Salier, J. P. Martin, P. Lambin, H. McPhee, and K. Hochstrasser* 273

SPECIAL TECHNIQUES

- A Solid-Phase Optoelectronic Sensor for Serum Albumin *M. J. Goldfinch and C. R. Lowe* 216
- An Anaerobic Spectroelectrochemical Cell for Studying the Spectral and Redox Properties of Flavoproteins *Marian T. Stankovich* 295
- Improved Microtechnique for Endotoxin Assay by the *Limulus* Amebocyte Lysate Test *Andreas Gardi and Gian R. Arpagaus* 382

SUBCELLULAR FRACTIONS AND SEPARATION

- Purification of Skeletal-Muscle Mitochondria by Density-Gradient Centrifugation with Percoll *James R. Mickelson, Marion L. Greaser, and B. Bruce Marsh* 255
- Preparation of Membrane Vesicles in Lithium Chloride from Cells of *Nitrosomonas europaea* *Basant Bhandari and D. J. D. Nicholas* 330
- Recovery of Microquantities of Subcellular Particles by Ultracentrifugation in Automatic Pipet Tips *M. R. V. Murthy, A. M. Gachon, J. L. Couderc, and B. Dastugue* 354

ERRATA

- Volume 101, Number 1, January 1, 1980: J. C. Myers, F. Ramirez, D. L. Kacian, M. Flood, and S. Spiegelman, "A Simple Purification of Avian Myeloblastosis Virus Reverse Transcriptase for Full-Length Transcription of 35 S RNA," pp. 88-96 480
- Volume 98, Number 2, October 1, 1979: Umberto Mura, Maurizio Romano, Francesco Sgarrella, and Pier Luigi Ipata, "A Coupled Optical Assay for Determination of Adenine in Mixtures," pp. 273-277 481
- Volume 99, Number 1, October 15, 1979: Phyllis R. Brown and Ante M. Krstulovic, "REVIEW: Practical Aspects of Reversed-Phase Liquid Chromatography Applied to Biochemical and Biomedical Research," pp 1-21 481

AUTHOR INDEX FOR VOLUME 109 482

CUMULATIVE SUBJECT INDEX FOR VOLUMES 101-109 484

INFORMATION FOR AUTHORS¹

Analytical Biochemistry will publish articles on methods of interest to the biochemical sciences and all fields that impinge on biochemical investigation, including those areas of immunology that include analytical and preparative methods for application by biochemists, cell and tissue culture techniques, and purification methods for specific enzymes and other proteins when such work has resulted in a high level of purity. Areas such as methods for sequencing and synthesizing DNA and RNA will be included. Invited review articles dealing with timely topics in methodology will also be published. In addition, book reviews covering titles directly related to the scope of the Journal and, specifically, to analytical and preparative methods in biochemistry and such impinging fields as immunology and tissue culture, will be published.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Analytical Biochemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Address. Manuscripts should be submitted to **Analytical Biochemistry, Editorial Office, 111 Fifth Avenue, New York, N. Y. 10003.**

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. At least three copies should be submitted, each copy to include all figures (originals or glossy prints) and tables. The original copy must be typewritten, double-spaced, on one side of white bond paper, about $8\frac{1}{2} \times 11$ inches in size, with one-inch margins on all sides. Each manuscript should have a separate title page noting title of article, authors' names (without degrees), a running title (not exceeding 35 letters and spaces), an abstract (50–150 words), and the address to which proof should be mailed. **Also, on the title page, authors should indicate the appropriate subject category for listing in the Table of Contents.** Please number all pages of the manuscript.

Names of chemical or organic substances should follow the recommendations of the IUPAC–IUB Combined Commission on Biochemical Nomenclature (CBN) as published in the extended Information for Authors, appearing in the first issue of each year of this journal.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Figures should be numbered consecutively with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced. All illustrations should be in finished form ready for the engraver. A convenient size for drawings is $8\frac{1}{2} \times 11$ inches (21×27.5 cm). Drawings should be made with India ink on tracing linen, smooth surface white paper, or Bristol board. Graph paper if used should be ruled in blue. Grid lines that are to show in the final engraving should be inked in black. Glossy prints properly prepared are acceptable.

Photographs must be kept to a minimum and should be glossy prints with strong contrasts; the magnification should be indicated by a scale where possible.

¹ An extended Information for Authors is published in the first issue of each year. Reprints are available from the Editorial Office. Authors should consult this Information for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table.

Footnotes should be designated in text by superscript numbers and listed on a separate sheet; in tables, by superscript letters and placed at the bottom of the page containing the table.

References to the literature should be cited in the text by Arabic numerals in parentheses and listed at the end of the paper in consecutive order. Abbreviations of journal titles should follow the style used in Chemical Abstracts' *Service Source Index* (1969 Edition). Please note style of capitalization and punctuation for journal articles and edited books in the following examples:

1. Jones, J. B., Dilworth, G. L., and Stadtman, T. C. (1979) *Arch. Biochem. Biophys.* **125**, 255-260.
2. Metzler, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. Harrington, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds), Vol. 4, pp. 246-409, Academic Press, New York.

Proofs. Galley proofs will be sent to the authors with reprint order forms. Fifty reprints of each article are provided free of charge. Additional reprints may be ordered on the form provided.
